JAHANVI

Backend Software Engineer | Node.js | NestJS | PostgreSQL

+91 7027114700 | jahanvi.s1234@gmail.com | LinkedIn

SUMMARY

Backend-focused Software Engineer with 4+ years of experience designing and building scalable APIs, microservices, database systems, and business-critical applications using Node.js, NestJS, TypeScript, and PostgreSQL. Strong expertise in SQL, database optimization, backend architecture, data migration, and distributed systems. Experienced in leading technical implementation, client communication, code reviews, and end-to-end project delivery, with additional experience in React, Next.js, AI integrations, and cloud technologies.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Backend: Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, Redis

ORM / Data Access: TypeORM, Prisma, Drizzle

Frontend: React, Next.js

Cloud & DevOps: AWS, Docker

Architecture: Clean Architecture, OOP, Design Patterns, Event-Driven Architecture, Queues, Caching, Database Optimization

Tools: Git, GitHub, GitLab, Postman, Swagger, Jira, Trello

PROFESSIONAL EXPERIENCE

GEEKYANTS | *Intern -> Software Engineer III*

July 2022 – Present

- Designed and developed scalable backend systems, APIs, microservices, and database architectures using Node.js, NestJS, TypeScript, PostgreSQL, GraphQL, and REST.
- Optimized database schemas, SQL queries, indexes, functions, and data-access layers to improve performance and scalability.
- Led backend development across multiple products, focusing on clean architecture, reliability, maintainability, and performance.
- Executed large-scale migration of **500K+ users and ~2M records** from legacy SQL systems to PostgreSQL.
- Collaborated with clients to analyze requirements, define technical solutions, resolve issues, and deliver projects end-to-end.

PROJECT EXPERIENCE

SOCIAL NETWORKING & RELATIONSHIP PLATFORM

Team Lead & Backend Developer

Stack: NestJS, Prisma, PostgreSQL, Docker, React, Flutter

- Led backend development and coordinated directly with the client and development team.
- Designed APIs and database architecture supporting friendship, volunteering, and dating workflows.
- Implemented social posts, video uploads, real-time chat, and video calling capabilities.
- Guided technical implementation and optimized backend services for scalability and maintainability.

FUEL FLEET MANAGEMENT SYSTEM

Team Lead & Backend Developer

Stack: NestJS, TypeORM, PostgreSQL, AWS

- Designed backend workflows for vehicle, fuel, mileage, breakdown, and driver activity management.
- Implemented fuel tracking and mileage APIs with optimized SQL queries.
- Implemented cursor-based pagination for efficient handling of large datasets.
- Led technical delivery and collaborated directly with the client on requirements and solutions.

COMMUNITY SOCIAL PLATFORM

Backend Developer

Stack: Node.js, Hasura, PostgreSQL, GraphQL

- Refactored backend architecture and optimized database interactions to improve API performance and system stability.
- Built scalable services supporting posts, questions, polls, quizzes, likes, comments, shares, follows, and blocking.
- Optimized queries and database operations for high-volume user interactions.

REAL ESTATE LEAD MANAGEMENT PLATFORM

Backend Developer

Stack: Node.js, Express.js, Hasura, PostgreSQL, Redis, GraphQL

- Developed APIs and GraphQL workflows for property, buyer, channel partner, lead, site visit, booking, and agreement management.
- Implemented authentication and authorization using JWT.
- Optimized backend workflows and database interactions using PostgreSQL and Redis.

NETWORKING & MATCHING PLATFORM

Full Stack Developer

Stack: React Native, Supabase, PostgreSQL, TypeScript, WebRTC

- Built backend and mobile features supporting Dating, Social, and Business networking modes.
- Designed matching and discovery workflows with PostgreSQL functions and optimized database queries.
- Implemented authentication, Row Level Security, role-based access control, real-time messaging, push notifications, and WebRTC voice/video calling.
- Managed Supabase database, storage, authentication, Edge Functions, and deployment workflows.

CUSTOM PRINT ORDER & BUSINESS PORTAL

Full Stack Developer

Stack: NestJS, Next.js, Hasura, PostgreSQL, Strapi, Stripe, Xero, PrintLogic

- Developed customer and business portals for customized print-order management.
- Implemented credit-based payments using Stripe and integrated Xero for accounting and invoice synchronization.
- Integrated PrintLogic for production workflows and maintained audit history for operational traceability.
- Optimized GraphQL APIs, database queries, and application workflows.

REWARDS & GIFT CARD MANAGEMENT SYSTEM

Backend Developer

Stack: NestJS, Drizzle, PostgreSQL, SQL, Cognito, StriveCloud

- Migrated 500K+ users and ~2M records from a legacy SQL database to PostgreSQL using structured migration scripts.
- Designed migration workflows ensuring data consistency and reliability across large datasets.
- Implemented authentication and user management using Amazon Cognito.

- Integrated StriveCloud for tokenomics and gamification and third-party services for offers and gift-card management.
- Optimized SQL queries and database operations for large-scale migration and rewards workflows.

KEY ACHIEVEMENTS

- Large-Scale Data Migration: Successfully migrated 500K+ users and ~2M records from a legacy SQL database to PostgreSQL while maintaining data consistency.
- Backend Architecture & Optimization: Refactored complex backend systems, reducing unnecessary database connections and improving API performance and system stability.
- End-to-End Ownership: Led projects from requirement analysis and architecture through development, client communication, delivery, and production support.
- AI Engineering: Contributed to HealOps, an AI-powered self-healing CI/CD pipeline capable of diagnosing and automatically resolving build failures.
- Technical Leadership: Led development teams, conducted code reviews, mentored developers, and drove backend architecture decisions.

EDUCATION

MBA in Information Technology | Amity University, Noida | 2023 – 2025 | A+

B.E. in Computer Science Engineering | Chitkara University, Rajpura | 2019 – 2023 | 9.99 CGPA

RECOGNITION

- Project Ownership Champion | Jan 2026
- Client Appreciation Award | Nov 2025
- Impact Contributor Award | May 2025

PUBLICATIONS

- **Scaling Down Before Scaling Up: Why Bigger Servers Don't Fix Bad Architecture | Article**
  Technical case study covering backend architecture, database connection management, API performance, and architectural optimization.
- **Automate the Obvious, Review the Rest: Designing AI-Powered Content Moderation | Article**
  Technical case study on AI-powered moderation using automated risk assessment, asynchronous processing, and human review.
